PROFESSIONAL SUMMARY

Computer Engineering graduate (AAST, 2026) and **AWS Certified Solutions Architect – Associate**, currently a Data Engineer trainee in ITIDA's train-to-hire program. Hands-on experience in data engineering (Python, SQL, Apache Spark, ETL/ELT), serverless AWS architecture, full-stack development (Angular, React, Spring Boot), REST APIs, and CI/CD (Docker, Jenkins, GitLab), backed by Cisco CCNA networking training. Eager to contribute to fast-paced engineering teams.

EDUCATION

Bachelor of Science in Computer Engineering **2021 – 2026**

Arab Academy for Science, Technology and Maritime Transport (AAST) | *Alexandria, Egypt*

TECHNICAL SKILLS

Programming: Java, Python, C#, SQL, OOP, API testing (Postman), structured logging, Agile/Scrum

Data Engineering: ETL/ELT pipelines, Apache Spark, data warehousing, data processing workflows

Cloud & DevOps: AWS (Lambda, S3, API Gateway, DynamoDB, Rekognition), serverless, Docker, Jenkins, GitLab CI/CD

Web Development: Angular, React, MERN stack, Spring Boot, REST APIs (Jersey, Jetty), full-stack development

Databases: Relational database design, SQL, complex queries, data integrity

Networking: Routing/switching (Cisco CCNA), NAT, network configuration and troubleshooting, system administration

Languages: Arabic (Native), English (Fluent), German (Intermediate)

EXPERIENCE

Data Engineer Intern (Train-to-Hire Program) **Jul 2026 – Present**

Information Technology Industry Development Agency (ITIDA) | *Alexandria, Egypt (Hybrid)*

- Selected for a competitive train-to-hire program; designing scalable ETL/ELT pipelines in Python and SQL.
- Building data warehousing and data management solutions with Apache Spark and AWS cloud architecture.

Teaching Assistant (Part-Time) **Sep 2026 – Present**

Arab Academy for Science, Technology and Maritime Transport (AAST) | *Alexandria, Egypt*

- Support faculty in course delivery and assist students on-site at AAST.

Software Engineering Intern **Apr 2026 – Jul 2026**

DXC Technology | *Egypt* | Project GitHub

- Built an IoT platform (Angular, Spring Boot) showing live sensor data with configurable thresholds and alerts.
- Containerized services with Docker and automated builds and deployment through a Jenkins CI/CD pipeline.
- Worked in an Agile team of 5, rotating across front-end, back-end, testing, DevOps, and the Scrum Master role.

Network Engineering Trainee **Jul 2024 – Oct 2024**

Telecom Egypt (WE) | *Alexandria, Egypt*

- Completed 120 hours of hands-on Cisco CCNA (200-301) training in routing/switching, NAT, and network configuration.

Network Support Team Member **Jun 2024**

Egyptian Collegiate Programming Contest (ECPC) | *Egypt*

- Configured switches, tested connectivity, and inspected devices to prepare the contest network infrastructure.
- Provided on-floor technical support during the live contest, resolving hardware and network issues under time pressure.

PROJECTS

AI-Driven Serverless Image Processing Pipeline | *AWS Lambda, S3, API Gateway, Rekognition, DynamoDB* | GitHub

- Built an event-driven pipeline: S3 presigned-URL uploads (API Gateway + Lambda) trigger image resizing and Rekognition label detection, with metadata stored in DynamoDB.
- Cut package size and cold-start issues by loading dependencies at runtime into Lambda's /tmp; resolved S3 SigV4/CORS failures to enable secure direct browser uploads.

ACPC Contest Platform (Graduation Project) | *Java, Jersey, Jetty, React, GitLab CI/CD*

- Re-engineered the ACPC contest system with a modern React UI on top of the PC² judging engine.
- As back-end developer, built the REST APIs (Jersey on Jetty) bridging the UI to PC², added structured logging, validated all endpoints with Postman, and set up a GitLab CI/CD pipeline for automated builds and deployment.

CERTIFICATIONS

- **AWS Certified Solutions Architect – Associate**, Amazon Web Services (2026) | View credential
- **Fortinet NSE 4 – FortiOS 7.6 Administrator**, Fortinet | View credential
- **Cisco CCNA (200-301) Training**, Telecom Egypt (WE), 120 hours (2024) | View credential
